PROFILE

Computer Science student with a strong foundation in web development and machine learning. Seeking an internship to apply my knowledge in real-world projects and gain industry experience.

PROJECTS

Local Medicinal Plant Classifier Using CNN

Built a deep learning model with Python, Keras, and TensorFlow to identify local medicinal plants from images. Used a Convolutional Neural Network (CNN) to improve accuracy in plant recognition, helping with identification and conservation efforts

Shell Sort Algorithm

Created a video explaining the Shell Sort algorithm, breaking down its steps and logic in a simple way. Included a visual demonstration to show how the sorting process works, making it easier to understand.
